JAPANESE SWORDS

Amongst the numberless articles of Japanese attire, works of art or mere household objects which the Restoration of 1868 compelled the Japanese to cast upon the market, none has met with such wide fame and yet with such a limited study as the Sword. When, in 1877, the Government prohibited the Samurai from wearing any longer the two swords which had been the privilege and distinctive mark of their martial caste, the Imperial wish was obeyed, notwithstanding the feeling that something was snipping in the life of the nation. Blades had been treasured for centuries, handed from father to son, looked upon as the soul of the owner for the sake of which he would refrain from any deed unbecoming a gentleman; some possessed histories going far back into the eleventh and twelfth centuries, when the country was at war within itself, around others were entwined romances, and above all, the sword was the faithful friend with which the Samurai might honourably end his life, either in the field or on the mats. A blade given by a father to his daughter on her wedding day was the emblem of that purity of life which the woman was expected to keep, and it was also the weapon with which she might seek repose in death, should occasion arise. The Restoration breaking up the old feudal system compelled the Samurai to part with their worldly goods to secure the necessities of life, the rich became poor, the poor lost all support, hence anything which might tempt the foreign buyer went swiftly out of the country; the circumstances had become rather more straitened for the Samurai class when the edict of 1877 compelled them to put aside their swords, and blades followed the lacquer, the paintings, the carvings which eager curio buyers snapped at inadequate prices. Many swords of first quality crossed the waters, besides thousands of poor blades which could be bought in dozens in the stores and bazaars of the old world. Hardly any attempt was made at keeping in the country any blades except those which were, so to speak, entailed heirlooms or those whose owners refused to part with at any price. Later, a few earnest people banded themselves into a Society for the
preservation and study of the National weapon: the Sword Society of Tokyo, which has published, during the last twelve years, a mass of information about swords. Collecting swords has become a national propensity, and the modern sword lover may have more blades, carefully kept and oft admired, than his ancestor of a century ago who could only wear two at a time. Magazines have sprung into existence dealing only with the sword and its accessories. Both in Europe and in America articles on the sword have been published, most of which, based upon the paper of Hutterott and nearly all inadequate. It is to be hoped that some more comprehensive work will soon appear to give the Western public a better knowledge of the ancient swords. In Japan, there are hundreds of books dealing with their makers, from ancient books now rare and costly to modern works crammed with information and obtainable for a few pence. What then is there about the Japanese blade which compels admiration? Far back in the Sung Dynasty a Chinese Poet sang its praises, later the Mediaeval European writers spoke in wonderment of the Katana, of its keenness of edge, of its swift stroke, of the respect paid to it; later still, folks were awed by the form of suicide we call seppuku, some saw in it only a barbarous disembowelment, few, perhaps, grasped that other important feature—the test of the truest friendship—that confidence in the bosom friend one entrusted with the cutting of one's head. Romance alone would not have made the blade an object of interest to the positive mind, attracted by the efficiency of the weapon, by its qualities qua sword, by the marvellous skill evinced in its forging, in the shaping of its harmonious curves. Further, the blade presented a characteristic temper; unlike the European swords evenly tempered throughout, it had a mere edge of great hardness backed by enough softer metal to ensure toughness, and to allow bending in preference to snapping when the sword blow met an unexpected resistance. Then it was realised that all those characteristic peculiarities required study, for they presented variations of appearance intimately associated with the various swordsmiths, with the periods, the schools. How numerous those smiths were may be guessed, but it may come as a surprise to some, that over 11,000 names are recorded in one book alone.

To study a blade and appreciate its points is a matter of considerable interest, the various portions of the blade have their names and their peculiarities; one must pay attention to every part of the body, of its edge, of the handle, etc., and with practice an expert may become able to recognise the technique and style of a smith by the peculiarities of the blade, silent witnesses left in the metal itself. Thus, in Japan, the Honami
family of sword experts were professionally engaged for over 350 years in examining and certifying blades.

In feudal days a man’s life was at his lord’s call, and he might never feel sure that the following day would not be his last, either in fight or by self infliction under orders of the death penalty for some breach, however slight, of the stiff code of Samurai etiquette. Hence his sword was selected and cared for, its edge must be keen enough to cut a man’s head at a blow, leaving, if skilfully done, a shred of skin on the throat for the head to hang on the breast.

His sword was tested, sometimes officially by cutting up corpses, and thus we come across blades on the tang of which is inscribed a statement that it cut one or two or even three bodies at a blow. No sword in Europe ever came through such an ordeal; indeed, it is doubtful whether its shape and constitution would have allowed a similar test to be successful. Looked upon as a cutting weapon, the Japanese blade has been pronounced perfect by all experts; that perfection is the result of thorough work undertaken with only one aim in view: to turn out a sword which was not only reliable, but a credit to the maker as well; and, indeed, the names of the smiths are as well known as those of the foremost painters, they rank with the expert calligraphers, with the poets, with the writers and the statesmen, with those who made history. Masamune, Muramasa, are names which have found their way even amongst the novels of the West; not a dozen names of Japanese sculptors can be mentioned, although their works are to be found in any and every temple, but 11,000 names of swords smiths remain. . . . Where the carver could repair a faulty chisel stroke the smith has no such resource, a slight flaw in welding his metal, a little dirt remaining between two layers of steel, and
where in a smithy can one exclude dirt? Overhaste in heating the metal resulting in a wrong temper, or in spots on the blade, and, lo, a fortnight's patient work was wasted, a patron offended, a reputation marred.

No less important than the smith's skill was that of the polisher grinding away the blade to its final shape, settling the planes and the curves, whose intersections are geometrically true on every side of the blade. A volume rather than a preface is required to do the scantiest justice to the Japanese blade, but space is limited, and the blades exhibited here speak for themselves.

H. L. J.
CATALOGUE.

1. KATANA. 2 shaku, 2 sun, 6 bu. 890, 685, 17 mm.* Ko Gunome midare yakiba, deep Kaeri bōshi, signed Sasaki Niudo Ippo of Gōshu. Kwanyei period (1624-1643).

2. KATANA. 855, 650, 11 mm. Narrow yakiba, engraved on one side with Ono no Tofu, the frog and willow, on the other with characters, Yanaigami Kan Ki. [Plate.

3. KATANA. 2 shaku, 1 sun. 795, 645, 13 mm. Very fine wave yakiba with deep niyé, signed Kagekuni of Settsu. (Manji period.)

4. KATANA. 2 shaku, 2 sun, 8 bu. 880, 695, 11 mm. Midare yakiba Bōshi majiri, signed Kaneuji, in gold inlay, attributed to Kaneuji of Mino.

5. KATANA. Large heavy blade. 2 shaku, 4 sun, 4 bu. 932, 710, 6. With long bōshi kaeri, midare yakiba, wave form with tsuyu, signed Korekazu, attributed to Fujiwara Korekazu of Yedo, Bushu. Circa Kwanbun (1661-1672).

8. KATANA. 2 shaku, 2 sun, 5 bu. 892, 685, 10. With nokogiri yakiba, double yasurime, signed Mutsu no Kami Daido, (Omichi of Mino). [Plate.

* The dimensions in millimetres represent the whole length, the length from Bōshi to Habaki moto, and the Sori respectively.
9. KATANA. 2 shaku, 2 sun, 8 bu. 880, 695, 17, mm. With long wave yakiba and deep groove, signed Harumitsu of Osafune, Bizen. [Plate.

10. KATANA. 2 shaku, 2 sun, 4 bu. 885, 680, 19 mm. Narrow yakiba, maru boshi, signed Kunimura, attributed to Kunimura of Kikuji Higo.

11. KATANA. 2 shaku, 3 sun. 860, 70, 21. Hitatsura on all jigane but not on shinogi, signed Akihiro of Soshu, dated second year of Teiji. [Plate.

12. KATANA. 2 shaku, 1 sun, 5 bu. 840, 650, 33. Ogunome midare yakiba with Rio no me tsuyu imitating splashing waves, signed Made at Toto (Yedo) by Kato (chounsai) Tsunatoshi, dated Bunsei 10, first month. [Plate.

13. KATANA. 2 shaku, 5 sun, 3 bu. 1,010 mm., 755 mm., 8 mm. sori, 75 mm. boshi, shinogi tapering from 10 to 8 mm. Very fine double yakiba, ko gunome midare and hitatsura, signed Muramasa. [Plate.

14. KATANA. 2 shaku, 3 sun, 4 bu. 920, 710, 23. Ko midare yakiba, signed Bushu no jiu Yamamoto Geki Toshinaga, Kyoho, 1716-1735. Jiugo mai Kabuto buse, i.e., made of metal folded fifteen times.

15. SHOBU BLADE. 520, 400, 8. Uno kubi style, Kammuri otoni, with Ken engraved and treble groove on other side up to the middle, unsigned, attributed to Hiromitsu.

16. KATANA. Bizen blade. 2 shaku, 4 sun, 5 bu. 950, 740, 22. Broad gunome midare yakiba, attributed to Yoshimitsu.

17. KATANA. Very curved blade, the lengths being 950 mm., 758 mm. and sori 26. Ko midare yakiba, narrow shinogi, signed Fuyuhiro of Soshu (Sagami).
18. KATANA. Broad blade. 2 shaku, 2 sun, 2 bu long. 940, 745, 18 mm. sori. With irregular yakiba in breaking waves style, the shinogi reduced on one side by two grooves (Hi), stopping a third of the way up, the portion nearer the heel being grooved singly and deeper, with tama reserve, single groove on other side, tapering nakago, signed Nagasoné Okisato Niudo Kotetsu Saku. [Plate.]

19. KATANA. The blade 2 shaku, 6 sun, 7 bu. 1,004 mm., 810, sori 10 mm. Choji midare yakiba, signed Kiushu, Higo Dotanuki Nobuyoshi (Shin-ka). Eiroku period. [Plate]

20. KATANA. 2 shaku, 5 sun. 990, 752, 20. Broad blade with tapering nakago, midare yakiba, signed Kawachi no Kami, Minamoto Motoyuki (Hon-ko), dated Genroku 9, the eighth month. Saijo nichì Goku Shin Kitai, i.e., the very truest forging on the most auspicious day. [Plate]

21. BIZEN KATANA. 2 shaku, 3 sun, 5 bu. 940, 710, sori 27 mm. Unsigned, grooved on both sides, attributed on its character to Kumotsugu (Unji) of Bizen, period Ōan (1368-1374). The double blood grooves on shinogi, the lower one ground down. [Plate]

22. KATANA. 915, 710, 8. Broad blade with long boshi, wide shinogi on one side with engraved Ken, the other side with deep groove engraved with a Bonji in reserve. Unsigned. Wide midare yakiba. [Plate]

25. KATANA. 878, 675, 6. Narrow yakiba with deep niyé and niöi, ken and Amakurikara ken horimono, signed Kotsuke no Suke, Minamoto Yoshimasa. [Plate]
26. KATANA. 940, 730, 17. Narrow yakiba, heavy blade, signed Yokoyama Sukemune of Osafune, Bizen, dated the third year of Bunkiu, the eighth month, 1863.

27. KATANA. 920, 695, 8. Very heavy blade with broad straight yakiba, signed Yamato no Kuni Heijo (Hira-shiro) Fujiwara no Michiharu (Dôsei), inscribed Naniwa sattei (Satsuma) Temmangu shi tomo ni Koreô tsukuru ken no do tetsu wo motte, Keio 2 (1866), eighth month—made of the same iron as the sword which I made for Temmangu Satsuma Yashiki in Osaka.

28. NARROW KATANA. 805, 635, 15. With straight yakiba, the Hi ground down, signed Riokai Muneyoshi, dated Taiyei 3 (1523), eighth month.

30. KATANA. 810, 610, 18. Gunomé midare yakiba, signed Sukemuné, engraved with Taishakuten as a Chinese warrior, sword in hand, standing on a dragon, and on the other side the characters Taishakuten, fittings of shakudo, and silver, with dragon and waves design. Red and black lacquer scabbard with dragon in silver and gold lacquer in relief.

32. WAKIZASHI. Broad blade. 605, 455, 12 mm. sori. Large midare yakiba, Bôshi Kaeri, signed Nagasada (Ei-tei) and dated Keio, first year, fourth month.

33. WAKIZASHI. Bizen blade. 1 shaku, 6 sun, 5 bu. 637, 495, 10. Grooved on both sides, midare yakiba, Kaku mune, tanzaku, signature, Bizen Osafune Norimitsu, dated Kiotoku, fifth year, second month (1456), interesting blade.
34. WAKIZASHI. 1 shaku, 6 sun, 8 bu. 645, 510, 17. With midare yakiba, signed Kuninaga, attributed to Senjuin in Shoö period, 1288-1292.

35. WAKIZASHI. 580, 435, 12. With remarkable kiku-sui yakiba, signed Setsuyo Okamoto Yasutomo, dated Bunkwa third year, eighth month. Shakudo fittings, nanako, red sparrows, and man walking on a path.

37. WAKIZASHI. Bizen blade. 550, 435, 17. With plain polished shakudo tsuba, all other mounts shibuichi inlaid with cranes, and water plants minute iroyé in relief, unsigned.

38. WAKIZASHI. 650, 465, 10. Hitatsura blade, signed Fujiwara no Kanemichi (Kindo) Iga no Kami, Nohon Kaji Sasho; on the other side, sixteen-petal chrysanthemum and the characters, Jorai (Kamiari yoké, protection against thunder).

39. WAKIZASHI. 510, 395, 10. Shobu, kammuri otoshi, signed Kanemoto. Shakudo tsuba nanako with animals of the zodiac, dragon menuki-fuchi and kashira, tiger and waves, shibuichi, signed Toshikagé.

41. TANTO. 360, 260, mm. Straight hiratsukuri with horimono of Dragon and Ken., Amakurikara Río, sugu-ha, signed Kagehira.

42. TANTO. 375, 275. Unsigned, with silver mounts engraved with a creeper, signed Riushosai Takahisa. Black scabbard with Karakusa in gold togidashi.
43. TANTO. 250, 190. Signed Mitsuhiro. Mounted entirely in metal, embossed with dragons and tigers, partly gilt.

45. TANTO. 320, 240. Suguha, signed Kaneshada, shibuichi mounts with cherry blossom on waves, signed Togintei Yoshiteru. Kozuka shibuichi with cherry blossom and maple leaves iroyé in relief, signed Goto Mitsumasa.

47. TANTO. 440, 325. Mounted with shibuichi tsuba in the shape of two butterflies, small fittings, shakudo keborei and hirazogan, flowers of the four seasons, signed Sugioka Ikki, Kozuka and Kogai to match, iroyé in relief. Red scabbard with fukiyose gold. Ex Gilbertson, coll.

49. TANTO. 380, 280. Mounted in the style of the Tanaka school, all the fittings ivory with clouds in relief and gold nunome, lacquer scabbard in Wakasa technique. Ex Gilbertson, coll.

51. TANTO. 370, 270. Narrow yakiba, signed Kanemune, the fittings nigurome with big nanako and plum blossoms in relief silver—Kozuka bamboo in shibuichi.

52. AIGUCHI. 340, 240. Midareba. Shakudo mounts, with engraved floral mon, signed Kanahara Naomichi, Kozuka shakudo nanako, flowers of Autumn, iroyé in relief, black lacquer scabbard with suzuki grass and dew-drops of silver.

53. AIGUCHI. 245. With narrow yakiba, fitted on silver mounts decorated with chidori and waves, Katakiri. Scabbard lacquered black with chidori decoration.

54. BOKUTO (wooden sword) decorated with a rabbit and waves, signed Zeshin.
